

# KEEPING HORSES HEALTHY

## SAFE AND EFFECTIVE DISINFECTANT USE

### REMEMBER C BEFORE D

Clean before applying a disinfectant. Make sure all organic materials are removed. For manure stains or caked on material, use a detergent to scrub the surface.

### READ THE LABEL

Be sure to follow the directions on the product. Every product has a different use and application protocol.

### FOLLOW THE CONTACT TIME

The disinfectant must have contact time with the surface to kill the viruses and bacteria. The surface must remain wet with disinfectant for the entire contact time listed on the product label.

### DON'T FORGET PPE

Follow the label instructions for the correct personal protective equipment to use while using the disinfectant.
