

VESICULAR STOMATITIS (VS) PROTECT YOUR HORSE: FLY PREVENTION

FLY SHEETS & FLY MASKS

Make sure your horse is wearing fly sheets and fly masks with ears and extension over the muzzle. This is a very important barrier between your horse and the flies.

FLY SPRAY

A long-acting fly spray that is resistant to rain is key when reducing fly exposure to your horse.

FLY OINTMENT

Protect the high risk areas of the horse (muzzle, ears, and around the eyes) with a roll-on or fly ointment

FAN

Install a fan on the stall door. Circulating the air in the stall helps deter flies.

Discounts are available for pictured items through the USEF MemberPerks Program

usef.org/join-usef/memberperks

*Pictured Items are from Big Ass Fans, Dover Saddlery, SmartPak, and Ultra Shield.
